

Information on Grant Disbursement

Overview

These Financial Guidelines must be used in conjunction with the Small Grants Fund Guidelines for Applicants and are incorporated into your Grant Agreement. As a recipient of a grant under the Small Grants Fund you agree to maintain a sound administrative and financial system capable of verifying all Financial Reports and Acquittals. The funding comes from the Australian Government and therefore may be subject to audit. **Therefore, grant recipients must take personal responsibility for the financial management of grants.** Aus4Skills is committed to working with alumni grant recipients to ensure accountability and value for money and to simplify the administration of the grants process as much as possible.

The purpose of these guidelines is to assist you to complete your financial acquittal responsibility as a grant awardee. Failure to acquit may result in funding suspension, the requirement to return all or part of the grant funds and further legal action as may be necessary to resolve the issue.

Payment of Grant Funds

Grants will be disbursed by bank transfer in Vietnamese dong (VND). Grants usually are disbursed over several payments in response to Funds Requests received from grant awardees based on the following principles:

- First disbursement may be up to 50% of total approved budget, except for presentation at international conference, where payment may be up to 80% of the approved budget.
- Second disbursement will be up to 30% of the grants value upon Aus4Skills' receiving a satisfactory Progress Report including Financial Acquittal Report and Second Funds Request.
- Disbursement of the outstanding grants will be subject to Aus4Skills' receiving a satisfactory Completion Report including Financial Acquittal Report and Final Funds Request.

Once a grant application has been approved no further funds will be made available for that activity within a Small Grants Fund round.

Grants are normally disbursed as set out below.

First Disbursement

After receiving Aus4Skills correspondence informing grantees that their activities have been approved, the grantees must complete an online First Funds Request Form. The form will then be reviewed for approval. Upon approval, the grantees will be notified to print, sign and submit the final version to Aus4Skills by post. For documents which require signatures and full names, this should be done in blue ink. The first funds approved will be advanced.

The following documents are required for completion of the online First Fund Request:

1. Copies of the Bank document with the name and the account number of the grantee to whom the grant funds will be transferred.
2. Documents showing the preparations for the activity (*e.g. invitation letter, visa appointment form, conference agenda, correspondences contacting local departments, list of survey participants, acceptance letters from local authorities etc.*)

No funds will be advanced unless this step is completed to Aus4Skills complete satisfaction.

Second Disbursement

(where there are only two disbursements, see Final Disbursement/Final Acquittal below)

Where more than two disbursements have been approved in the Grant Agreement, the following steps must be taken.

Within 30 days from the accomplishment of the activities listed on the First Funds Request, the grantees must complete an online Progress Report (including Financial Acquittal Report)/Second Funds Request Form. The form will then be reviewed for approval. Upon approval, the grantees will be notified to print, sign and submit the final version with original financial documents to Aus4Skills by post. For documents which require signatures and full names, this must be done in blue ink. The second funds disbursement approved will then be advanced.

The documents required for completion of the online Progress Report (including Financial Acquittal Report)/Second Funds Request are:

1. A scanned copy of all receipts and other forms of documentation for financial acquittal of the first disbursement.
2. Evidence of photographs of your activities *(at least three photos with captions)*.

No further funds will be advanced unless this step is completed to Aus4Skills complete satisfaction.

Final Disbursement (Final Acquittal)

Within 30 days from the accomplishment of the activities listed in the first or the second advance (if there are two advances), the grantees must complete the online Completion Report (including Financial Acquittal Report)/Final Funds Request Form. The form will then be reviewed for approval. Upon approval, the grantees will be notified to print, sign and submit the final version with original financial documents to Aus4Skills by post. For documents which require signatures and full names, this must be done in blue ink. The final funds disbursement approved will then be paid.

To complete the online Completion Report (including Financial Acquittal Report)/Final Funds Request, the following documents should be prepared:

1. A scanned copy of all receipts and other forms of documentation for financial acquittal of the second disbursement.
2. Communication materials for your activity promotion including photographs *(at least three photos with captions)* or videos, news articles, social media posts, website etc.

No further funds will be advanced unless this step is completed to Aus4Skills complete satisfaction.

Project Details

Achievements

Describe the achievements against the Project Objectives as stated in your Approved Application. Please address the following:

- *How far have you achieved the overall objective(s) of the activity*
- *Report against all output (deliverables) and outcome (effect) indicators in the Monitoring and Evaluation section of your Approved Application*
- *Explain any significant differences in numbers of participants/interviewees, activities/ events or locations of activities as compared to what you planned in the Approved Application*

*

All objectives of the project were achieved. Four Working Packages (WPs) of the project were implemented successfully. Total direct beneficiaries are 364 (122 females/242 males). Total indirect beneficiaries are 700 (300 females/400 males). The significant outcomes of the project are to build strong ties between Australian and Vietnam Organic Agriculture through research, education and trade.

For WP1, Australian Alumni for Vietnam (AAV) team has established the link with ACT Health, ANU Fenner School of Environment & Society, National Environmental Centre in Albury (NSW), Organic Agriculture Association (OAA) in Bairnsdale-Victoria, National Association of Sustainable Agriculture Australia (NASAA), Canberra Organic Growers Societies (COGS), organic growers and processors in ACT, NSW, Victoria and South Australia to provide technical & intellectual support and trade (international organic certification) for organic growers in Vietnam. AAV team shared the outcomes of the Mekong Delta Forum on Organic Agriculture in Bairnsdale and the progress of organic agriculture movement in Vietnam with Australian Organic partners.

Aus4Skills Small Grants Fund Round 2 - 2018
SGF R2-2018 | Completion Report/Final Funds Request (Version 2 of 2)
Application SGF-R2-00064 From Van Kien Nguyen
 Form Submitted 18 Dec 2019, 6:33pm WIB

In WP 2, AAV team delivered successfully a regional Mekong Delta Forum on organic agriculture: linking Australia and Vietnam, with the participation of over 200 people who are senior government officials, private sectors (rice companies), NGOs, researcher, and organic growers. We created a platform for business to link with farmers and government officials to implement the organic farming practices and trade. We also linked NASAA & OAA to provide certification services and training for growers and business.

For WP3, community gardens were piloted in Khmer community with participation of Khmer women and monks. We hosted two stakeholder workshops at B52 Khmer temple in Tri Ton District (35 male & 19 female) and Ta Ngao Khmer temple (23 male & 9 female). Ta Ngao Temple is a replication of the outcome of the WP3 which is funded by PEER project, https://sites.nationalacademies.org/PGA/PEER/PEERscience/PGA_152053

Monks and Khmer women and children have accessed safe food to improve nutrition and health while women engaged in growing small scale organic vegetables to escape poverty. Mrs Naeng Kia, a Khmer woman can save money to buy a rice cooker and facility generated from the income of organic vegetable garden. Communal government officials adopted this success to replicate the home-based organic vegetable garden for other poor Khmer women in the village. It is important that local government suggested our AAV team to seek additional resources to scale up this project in O Lam Commune for poverty reduction.

For WP4, Mekong Organics Platform was found by AAV team to promote research, training, trade and development on organic food production for disadvantaged communities, private sectors and government officials across Vietnam. Initially, Dr Van Kien Nguyen has established a website of Mekong Organics (in 2017), and updated into a limited company but operated as a social enterprise. The Mekong Organics is registered in ACT Canberra Australia which aims to support organic agriculture movement in the Mekong Region. <http://www.mekongorganics.net.au/>

Mekong Organics' activities are promoted by linking with national, regional and local governments and AAV alumni network through Australian Alumni Network on Facebook and video.

Direct Beneficiaries

Direct beneficiaries are those who **directly participate and benefit** from the actions and services of your project (e.g, training participants, field workers, co-researcher, etc.)

- *Clearly indicate number of **direct beneficiaries** in the project.*
- *Data gathered should be disaggregated into subgroups of **sex, disability, ethnic groups** where applicable.*

Please refer to the Target Beneficiaries section in your approved application and break down type of direct beneficiaries by provinces.

The statement should be "**Province - Type of direct beneficiaries**". If there are more than one type of direct beneficiaries and your project was conducted in more than one province, please list out as much as possible below by clicking the "Add More" button.

Type of direct beneficiaries	Female	Male

Achievement Against Aus4Skills' Program Outcomes

Clearly demonstrate how the completion of the project contributes to meeting one or more of the three Aus4Skills program outcomes. Refer to your approved proposal and report againsts those the information supplied there.

Program Outcome 1

Outcome 1: Male and female alumni use new skills and knowledge to make positive contributions to selected priority areas.

- Did you apply learned knowledge and skills gained from Australian education institutions through your grant? Please give clear examples.
- Clearly demonstrate what positive contributions your project made

*

The AAS team at AGU has a multidisciplinary background. The team gained the knowledge and skills from Australian education institutions in the field of sociology, environmental management, agriculture, public health, nutrition and community development. The knowledge is used to implement four work packages of the project. For instance, Dr. Kien Van Nguyen engaged deeply with Australian Organic agriculture in the past few years since he has promoted the agroecological farming system projects to develop sustainable floating rice-based farming systems in the Mekong Delta and extended to Cambodia and Myanmar. Dr. Kien has used the skills of networking with various stakeholders from Australia and Vietnam to engage in the Mekong Forum (WP3) in Jan 2019 at AGU and organize a study tour for AAV team members to visit Australian organic industry (WP1) in March 2019. Mr. Hiep Ngoc Le and Mr. Thai Van Nguyen have applied the knowledge of public health, nutrition and community-based action research into setting up community/home-based organic vegetable gardens with Khmer women and Khmer temples on the ground (WP4) in Tri Ton District of An Giang province. The project outcomes were disseminated on the Mekong Organics Hub website, facebook, and fanpage (WP2). As a result, new skills and knowledge about organic agriculture, nutrition and health were shared with organic farming communities in Vietnam since it is on the top priority of Australian Aid, and the urgent needs of Vietnamese governments, private sectors, growers, NGOs, and civil societies. Positive contribution of the project includes (1) poverty reduction of Khmer communities (women), (2) awareness of organic agriculture-nutrition and health were improved by communities, (3) networking of organic growers, private sectors, government and researchers were established to promote organic farming across Vietnam.

Must be no more than 500 words

Program Outcome 2

Outcome 2: Stronger workplace enabling environments for skills utilisation in selected priority areas

- Did your project make any contribution to strengthen workplace enabling environments for skills utilisation? (e.g, promote organisational and institutional changes including improvement in policy, procedures, practices, performance standards etc.). If yes, please give clear examples.
- Did you transfer knowledge and skills to colleagues and peers through your grant? If yes, please give clear examples.

*

Through the Aus4skills grant, it has given the AAS team an opportunity to share and transfer the knowledge and skills to our colleagues and peers with regards to organic agriculture research and practices. Particularly, the Mekong Forum (WP3) on organic agriculture movement has created a platform for staff, academics, and relevant stakeholders in the South of Vietnam and other AAS Alumni to discuss about the step-by-step development process of organic agriculture in the Vietnamese Mekong Delta and Australia. More importantly, this forum engaged policy makers at provincial, district, and commune levels

to discuss how to promote organic farming movement and how to raise awareness on organic farming practices, food security and public health in the context of overusing the pesticide and fertilizers on the crops in the Vietnamese Mekong Delta. Therefore, it is expected that the discussion results of the Mekong forum and the project activities will be potential to influence policy decision making processes on forwarding sustainable agriculture development in the future. The Mekong Organics team was set up to share organic development practices for Ca Mau (organic rice shrimp), Soc Trang (organic rice), Vinh Long (organic Rice), An Giang (safe vegetables), Dong Thap (ecological rice), HCM City (natural vegetable), Tay Ninh (organic fertilizer factory), Binh Phuoc (organic paper, cashew nut, avocado, coffee), Ba Ria Vung Tau (organic cacao), Binh Phuoc (organic pepper), and Lam Dong (organic vegetables).

Must be no more than 500 words

Program Outcome 3

Outcome 3: Australia and Vietnam have stronger, sustainable links in selected sectors/agencies

- Did you establish or maintain people-to-people or professional links with Australia through your grant? If yes, please give clear examples.

Examples:

- network building: Grant activity introduced Vietnamese academics to a new network of Australian academics; Grant activity reinforced an existing linkage between Australian and Vietnamese institutions
- knowledge sharing: Australian university provided access to its information resources (e.g. online materials); Research was based on methodologies used in Australian university; Research results were shared with Australian academics, researchers or professionals
- capacity building: Australian professors/supervisors provided advice to Vietnamese researchers; Australian professors trained Vietnamese researchers; Australian and Vietnamese researchers worked together on research activity

*

Through the grant, the AAS team has established the network with Australian actors in the field of organic agriculture. Currently, Mekong Organics team is collaborating with the Organic Agriculture Association (OAA) in Gippsland, Victoria, and Canberra Organic Grower Society (COGS), Canberra Organic Growers Society, Peter Randall Organic Rice and National Association of Organic Agriculture Australia (NASAA), Organic Trust Australia: Research and Education. More importantly the vice president of OAA supported the AAS team (Mekong Organics team) to conduct the training course on organic farming practices and principles in An Giang University in January, 2019, and he is always willing provide more training courses across Vietnam in 2019, 2020 and longer term.. Also, the AAS team did visit the COGS through Australia study tour, and Dr. Kien is a key member of this organization in the last several years. He is also a key coordinator to facilitate 6 Vietnamese organic growers in the South of Vietnam to visit Australian Organic Farmers and Industry, which is funded by the Rotary Club of Hall in Canberra. Furthermore, the AAS team has set up the Mekong Organics PTY LTD to work with NASSA in the field of organic agriculture certification and other consultation services for small scale organic growers in Vietnam

Furthermore, the Mekong Organics has the link with Australian organic operator, managers and researchers. In particular, we have partnered with Peter Randall who is a local farmer (organic rice) in Leeton, New South Wales. He has operated a farm of 250 ha, including 400 ships, 50 ha of rice each year and rotate in every year. The Mekong Organics team plans to invite Mr. Peter to co-organize a training course on organic rice cultivation for organic

rice growers in the Mekong Delta in the next few years. Moreover, we have had a chance to discuss with Mr. Rob at the National Environment Centre, Riverina Institute at Wagga Wagga, New South Wales. This center is running the diploma of organic agriculture, diploma of permaculture. It will be potential to make a future plan for Vietnamese farmers and students to do study organic agriculture conservation and permaculture at this center.

Must be no more than 500 words

Contributions to broader impact

In addition to the Aus4Skills Program Outcomes, your grant can contribute to broader impact.

Please tick any boxes below that your project has contributed to *

- Vietnamese Government policy
- Empowerment/inclusion of people with disability
- Gender equality, women's leadership, women's economic empowerment
- Inclusion of the rural disadvantaged, including rural disadvantaged ethnic minorities
- Development of local communities
- Promotion of private sector development
- Strengthening, extending professional networks of alumni

Please clearly demonstrate how your grant has made contributions to selected broader impact *

The Aus4skills grant has contributed to promote organic agriculture sector in the Mekong Delta and Vietnam at large. In particular, the AAS team successfully conducted a training course on the principles and applied techniques in organic farming practices: experiences from Australia in January 2019. This course engaged various participants from government, private sectors, and Khmer and Kinh farmers around the Vietnamese Mekong Delta. Through the course, the participants gained the basic knowledge about how to make composting and crop rotation by growing legumes in order to keep straw and improve soil fertility; and how to use techniques to control insects and diseases throughout the stages of agricultural production. Moreover, these have learnt about how to design and use earthworm manure in organic farming; and how to use locally available wild plants in crop pest control to properly store and preserve seeds after harvest.

Impacts:

1/ Government officials, for example, Ca Mau Department of Agriculture & Rural Development (DARD), Sub-Department of Crops and Plant Protection in linking with private sectors (Minh Phu Group, Tan Vuong Group, Ong Tho Rice Company, and Co May Group) have initiated the organic village to promote organic rice-shrimp in Tri Luc Commune of Thoi Binh District, Ca Mau province. These companies and Ca Mau DARD have sent staff to the forum and the training courses provided in WP2. In return, Ca Mau DARD proposed a 5 year plan and vision 2030 for organic agriculture development in Ca Mau.

2/ Private sectors, Ong Tho Rice, Tan Vuong Rice, and Co May Group are more confident to invest in organic rice-shrimp farming in Ca Mau province. Mekong Organics made a link between private sectors and growers and government officials through the forum at AGU.

3/ Wider impacts on students and farmers. The AAS team has developed the network of male and female farmers, founders, agricultural extension staff, small and medium enterprises of practicing organic farming throughout Vietnam. We have shared with these actors about the results of this project at both formal and informal meetings in the Southern, Central and Northern parts of Vietnam. We have mainly focused on discussing the positive and negative aspects of promoting organic agriculture; and setting up the organic farming network among these actors. Furthermore, we are going to make a strategic plan of how

to collect good quality of Vietnamese organic products and export it to Australia and other countries.

Must be no more than 500 words.

If relevant, please give examples of Australia's capabilities and credentials in education, science, research and innovation being promoted by your grant. For example, did your grant involve any introduction of improved practices and/or technologies from Australia? *

In study tour of visiting Australian organic farms, the AAS team has learned the knowledge, skills and practices of Australian farmers through organic farming systems. In particular, we learnt how to design organic vegetable gardens by planting different kinds of flowering trees in order to attract good insects for biodiversity purposes. Also, the study tour provided us a chance to have insights of organic farming practices, such as compost making and seasonal calendar note-taking. Furthermore, we have also learnt cooperative skills of Australian residents, especially in the activities of garden plans, design, management and development through community-based organic vegetable garden in Charnwood, Canberra and the Bairnsdale town, Victoria. These have applied for the WP4 of piloting community-based organic vegetable garden for the Khmer temple in O Lam commune, Tri Ton district, An Giang Province.

Must be no more than 500 words.

Dissemination of Results

Have you disseminated the results/outcomes of the grant (e.g. workshop, publication or other)? If yes, please clearly describe. If not, how do you intend to do so?

*

The project result is disseminated to the public through social media, such as the An Giang Television, Hau Giang TV, Vietnam News, regional newspaper and informal events of organic agriculture development in other provinces throughout Vietnam (Ca Mau, Soc Trang, An Giang, Vinh Long, Dong Thap, HCM City, Tay Ninh, Ba Ria Vung Tau, Binh Phuoc, Dak Nong, and Lam Dong province)The details of disseminating the project results will be described as below:

Total Grants and Expenditure

(A) Total Approved Budget (VND)	(B) Total Grant Budget Received (VND)	(C) Total Grant Budget Spent (VND)	Total Balance (B - C)
\$158,685,256 This number/amount is calculated.	\$74,328,000 This number/amount is calculated.	\$165,920,234 This number/amount is calculated.	-\$91,592,234 This number/amount is calculated.

Approved Second Disbursement Validation

\$0
 This number/amount is calculated.
 The result must be 0. If error occurs, please check your input in column (B) of Grants and Expenditure Summary section

Final Funds Request

*** indicates a required field**

Funds Validation

Aus4Skills Small Grants Fund Round 2 - 2018
SGF R2-2018 | Completion Report/Final Funds Request (Version 2 of 2)
Application SGF-R2-00064 From Van Kien Nguyen
 Form Submitted 18 Dec 2019, 6:33pm WIB

(A) Total Approved Budget (VND)

\$248,698,867
 This number/amount is calculated.

(B) Total Disbursed Amount (VND)

\$197,916,064
 This number/amount is calculated.

(C) Total Actual Expense (VND)

\$246,660,918
 This number/amount is calculated.

Amount First Disbursement (VND)

\$123,588,064
 This number/amount is calculated.

First Actual Expense (VND)

\$80,740,684
 This number/amount is calculated.

Amount Second Disbursement (VND)

\$74,328,000
 This number/amount is calculated.

Second Actual Expense (VND)

\$165,920,234
 This number/amount is calculated.

Based on the above Funds Validation, please select the most suitable option to your funds expenditure: *

- Total Actual Expense is over or equal to Total Approved Budget ($C \geq A$)
- Total Actual Expense is under Total Approved Budget, but over Total Disbursed Amount ($B < C < A$)
- Total Actual Expense is under Total Disbursed Amount ($C < B$)
- Total Actual Expense is equal to Total Disbursed Amount ($C = B$)

Final Funds Request

Please ensure the amount required for Final Funds Request is accurate as the total disbursement amount cannot exceed your approved budget.

Approved Items of Expenditure	Details	Amount Required (VND)
Airfare (Ho Chi Minh city-Sydney-Ho Chi Minh city)	Ticket	\$11,400,971
Sydney to Canberra, by coach (taxi fare from Sydney airport to Canberra)	Ticket	\$623,604
Ground transportation at Canberra by car	1 bill petrol	\$995,228
Airfare (Melbourne to Adelaide)	Ticket	\$956,000
Airfare (Adelaide to Sydney)	Ticket	\$4,156,000
Renting venue for workshops and decorating the room	2 workshop	\$2,000,000

Aus4Skills Small Grants Fund Round 2 - 2018
